

// **IMAGINE MOBILE**
// HTML TEST 02
// Tilt to explore colours

// PORTRAIT MOCKUPS

// LANDSCAPE MOCKUPS

// **INSTRUCTIONS**

Create 4 layers in an HTML document, as per mock-ups above, using the images provided to you. This is a mobile webpage.

We’ve provided image assets for both portrait and landscape orientations. The correct images should appear depending on the user’s device orientation.

The aim of this page is to allow the user to navigate between layers by tilting the device.

Example: on the BLUE page tilting your device to the left takes you to the GREEN page and tilting it to the right takes you to the YELLOW page.

There should also be a fading effect when transitioning between layers.

Good luck.
